DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121: ¹

I. Claims 1-30 and 32 , drawn to detection sensors with the possibility of capacitive coupling as shown in figs, classified in class 340, subclass 854.8, 870+, 856.3 or 854.6 .

II. Claim 31 is drawn to a communication device including possibly a telephone device which can operate in a speaker mode based on distance detection of one's ear from the phone, classified in class 379, subclass 420+.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed for the reasons given in the grouping of the claims. The subcombination has separate utility such as loudspeaker mode in a telephone set.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2643

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
